

PROFESSIONAL SUMMARY

Business Analyst who ships working AI products and turns raw data into decisions. Built **TrajectIQ™** — a live AI career-intelligence platform — solo, end-to-end, then analyzed its first-week GA4 data into a conversion funnel and a prioritized growth plan.

SKILLS & CERTIFICATIONS

DATA & ANALYTICS	SQL (PostgreSQL) · Python (ETL pipelines) · Advanced Excel (Pivot Tables, XLOOKUP, Macros, Power Query) · Tableau · Google Analytics 4 · Relational data modeling (Postgres, Google Sheets) · Data validation
BUSINESS ANALYSIS	SDLC & iterative delivery · Gap analysis · UAT · QA / release audits · Stakeholder & client management · Pricing & business-case analysis · Market & competitive research
AI	Anthropic Claude API · Claude Code (AI pair-programming) · Prompt engineering · Agentic workflows · AI product management
PLATFORMS & CLOUD	Supabase (Auth, Postgres, Row-Level Security) · Netlify serverless · GitHub Actions CI/CD · OAuth2 · PayPal subscription billing · Oracle NetSuite CRM · SPS Commerce · Acctivate ERP
CERTIFICATIONS	Google Business Intelligence · Google AI Essentials · Anthropic Claude 101 · In progress: CompTIA Security+ & Azure AZ-900 (June 2026), Microsoft PL-300 (Dec 2026)

PROFESSIONAL TRAINING

Infrastructure, Security & Data Track

JUN 2026 – DEC 2026

THE ACADEMY · FORT LAUDERDALE, FL

- Building enterprise security and cloud fundamentals (17 chapters of security architecture) — on track for **CompTIA Security+** and **Azure AZ-900** (2026), with **Microsoft PL-300** / Power BI in December 2026.
- Practicing defensive configuration in isolated sandbox labs — vulnerability auditing, Access Control Lists (ACLs), and Zero Trust — adding the security & compliance literacy finance- and healthcare-sector analyst roles increasingly value.

WORK EXPERIENCE

AI Business Analyst

MAR 2026 – PRESENT

FUSTECH CONSULTING, LLC · FORT LAUDERDALE, FL

- Launched **TrajectIQ™**, a live AI career-intelligence platform validated by **40+ beta users** — by driving the full SDLC solo with Claude Code: requirements → architecture → **55 versioned iterations** → release QA audits → UAT → CI/CD deployment.
- Converted **28% of first-week visitors into captured leads** (122 visitors → 34 leads, measured in GA4) — by replacing the account-creation wall with a one-field email capture and instrumenting full-funnel event tracking.
- Produced a decision-ready 30-day growth plan targeting a diagnosed **58% homepage bounce** — by analyzing first-week funnel data and prioritizing lead-nurture emails, shareable results, and a homepage rework.
- Achieved zero client-side exposure of the proprietary scoring engine — by architecting it into Netlify serverless functions behind Supabase auth, Google OAuth2, Row-Level Security, and CSP headers.
- Enabled revenue from launch day with live 3-tier subscription pricing — by integrating PayPal billing with webhook lifecycle sync; shipped 4 more production AI apps via GitHub Actions CI/CD.
- Saved the company from a potential six-figure trademark dispute — by running USPTO prior-art research across 4 brand names, surfacing a funded-competitor conflict, and building the rename business case.

Data Analyst — Contract

JAN 2026 – MAR 2026

NEO ARCHITECTURAL LIGHTING · VIA PRIDESTAFF · HOLLYWOOD, FL

- Delivered a campaign-ready **833-firm** NYC go-to-market database to C-suite leadership — by sourcing, cleaning, and validating 399 emails and 586 LinkedIn URLs across 6 specifier categories.
- Protected **\$9,022** in commission from an unrecoverable loss — by catching missing specifier data on a purchase order and locking in documentation before entry.
- Prevented a mispriced international order, a 53% European discount wrongly applied to a US contract — by cross-referencing two price-list files and correcting the unit price before processing.

Account Manager

JUN 2025 – DEC 2025

PHARMSOURCE WHOLESAL · SUNRISE, FL

- Generated **\$24,036** in revenue across 39 orders in 6 months with zero billing disputes — by managing owner and purchasing-contact relationships across a 603-account portfolio.
- Maintained zero order errors across the full order lifecycle — by building quotes, processing sales orders, and tracking fulfillment in Oracle NetSuite CRM.

Case Analyst

JUN 2023 – SEP 2024

NYC DEPARTMENT OF HEALTH & MENTAL HYGIENE · NEW YORK, NY

- Sustained zero documentation errors across all reporting cycles — by maintaining audit-ready compliance records for an active agency caseload.
- Accelerated case resolution across the unit — by proactively reviewing records and escalating progression gaps to supervisors.

SELECTED PROJECTS — DELMANUELCRUZ-WQ.GITHUB.IO

- The AI Hiring Lens** PYTHON · ETL · SCORING MODEL — scored a real candidate against a Fortune 100 bank's 2026 hiring profile (0-100 model + gap analysis) via a Python ETL pipeline over 20 live job postings, with unit tests and documented data provenance.
- SF Crime Analysis** SQL · PYTHON · TABLEAU · TEAM OF 5 — analyzed a year of San Francisco incident data to map hotspots and timing patterns and recommend funding priorities; built the Tableau dashboards.
- Magic City Telecom Capstone** AUDIENCE ANALYTICS · A/B TESTING — audience analyst on a 4-team capstone; segmentation + A/B testing (CPA/CTR/CVR) surfaced ~\$500K in potential savings and an 8.54% conversion lift.

FELLOWSHIP & EDUCATION

Data Analytics Fellow

AUG 2024 – DEC 2024

COOP CAREERS — DATA ANALYTICS FELLOWSHIP · MIAMI, FL (REMOTE)

- Returned as a fellowship alum to mentor **40+ incoming fellows** on breaking into data — after building my own analytics foundation (SQL, Tableau, Advanced Excel) through 200+ hours of applied training across 3 full-scale projects.

Florida International University

MIAMI, FL

BACHELOR OF ARTS — INTERNATIONAL RELATIONS
